

*Model BPFL/CNT-30, 30 cu. ft. Bear Resistant Food Locker with green textured powder coated finish.*

- **Certified by the Interagency Grizzly Bear Committee**
  - *Model BPFL-25: IGBC Certificate #5123*
  - *Model BPFL-30: IGBC Certificate #5105*
- **Protects food and property from bears**
- **12 ga. steel plate construction**
- **12 ga. pregalvanized steel plate bottom panel**
- **Reinforced doors have full length continuous hinge and reinforced latch**
- **Meets ADA guidelines for accessibility**
- **Latch can be operated from inside for safety**
- **Air louvers in back panel allow ventilation but restrict insect access**
- **Top interior support channel includes hooks for hanging bags**
- **Leveling feet with included concrete anchors adjust for uneven mounting surface**
- **Units can be stacked to maximize storage capacity in small spaces**
- **Textured powder coat finish**

**AVAILABLE OPTIONS**

**Textured powder coat finish available in five colors**

**SPECIFICATIONS:**

- **Model BPFL** Bear Resistant Food Locker provides secure storage of food and property in camping areas where bears frequently raid campsites for food. The locker has been tested and certified by the Interagency Grizzly Bear Committee as being bear resistant. The locker also meets ADA accessibility guidelines.
- **Model BPFL-25** has nominal overall unit dimension of: 40-3/8" h x 47-3/4"w x 30-1/2"d. The outside locker dimensions are (nom.): 33"h x 47-3/4" w x 30-1/2" d creating **25 cubic feet** inside capacity
- **Model BPFL-30** has nominal overall unit dimension of: 40-3/8" h x 47-3/4" w x 37-1/2"d. The outside locker dimensions are (nom.): 33" h x 47-3/4" w x 37-1/2" d creating **30 cubic feet** inside capacity.
- The food locker box is constructed of die-formed 12 ga. steel plate side, back, and top panels welded to die-formed 12 ga. steel channels that form a reinforcing framework.
- The doors are die-formed 12 ga. steel plate with steel angle reinforcement, mounted on a stainless steel continuous hinge. Both doors are secured with two reinforced steel latches— a total of four latch points. An outside cover over the latch allows human operation while preventing access by bears. As a safety feature, the latch can be operated from inside the locker.
- All Food Lockers are equipped with a Hasp that extends through a slot in the top of the Right-hand Door on Models BPFL-25 and BPFL-30. A Padlock may be attached through the Hole in the Hasp to make the Food Lockers even more secure.
- A galvanized steel plate covers the inside latch to prevent contents inside from interfering with the latch operation on the outside.
- The back panel of the locker includes louvered ventilation openings that restrict insect access.
- The size of the locker allows most coolers to be opened while inside the locker. An interior top support channel includes cutouts designed as hooks for hanging bags.
- The bottom panel of the locker is constructed of die-formed pregalvanized 12 ga. steel.
- Four adjustable mounting plates with four 1/2" x 5" concrete screw anchors (Anchor Kit #ANC5-4) are included to allow leveling and securing on uneven surfaces. The food locker must be anchored to a concrete surface to be bear resistant.
- Bolt hole knock-outs are provided in the top panel to allow like-sized units to be stacked and secured to maximize storage in minimal spaces.
- Unit ships fully assembled, ready for installation.
- Entire unit with exception of pregalvanized bottom panel and latch assembly are finished with a brown textured powder coat paint (indicated by "/CWT" in model no., e.g. BPFL/CWT-25).
- **Optional:** Textured powder coat finish is available in other colors. Change "/CWT" in model no. to "/CBT" for black, "/CNT" for green, "/CTT" for speckled tan, or "/CUT" for blue.
