

*Model UTK/CB-6DR 6 ft. Children's Rectangular Table
with black powder coated frames
and red D-type thermo-plastic coated expanded steel top and seats*

- **Scaled to fit children up to 12 years of age**
- **Nontip, nontrip, walk-through design**
- **Strong 1-5/8" diameter all welded, steel pipe end frame construction**
- **Frames are hot-dip galvanized after fabrication for superior corrosion resistance**
- **Diagonal bracing for strength and rigidity**
- **Thermo-plastic Coating heat fused to Expanded Steel Top and Seats for durability**
- **Thermo-plastic Coating formulated with U.V. stabilizers for ultraviolet protection**

SPECIFICATIONS:

- **UTK Series** end frames are one-piece welded construction, fabricated from 1.660" O.D. (1-5/8" O.D.) steel pipe to meet 1-1/4" nominal pipe size specifications with 2" x 2" x 1/8" die formed steel angle for attaching the seats and top.
- Table frame design incorporates nontip, nontrip, walk-through design features. Bends are tightly formed to prevent tipping when weight is on one side.
- **Model UTK/G-6** has a 6 ft. nominal length.
- **Model UTK/G-8** has a 8 ft. nominal length.
- Nominal table height is 22". Nominal seat height is 12".
- Frames are supported by diagonal braces of 1-5/16" O.D. steel pipe that connect to the underside of the table top to align and provide attachment to the table top.
- All fasteners are provided for assembly.
- **Standard:** All steel frame components are hot-dip galvanized after fabrication to ASTM-A123 to maintain an average zinc coating of 2.0 oz. per sq. ft. of surface area (indicated by "/G" in model no., e.g. UTK/G-6DW).
- **D-Type** table top and seats are each a one-piece welded construction, fabricated from a 3/4-#9 expanded steel surface with 2" roll-formed 14 ga. steel vertical edges on all sides and reinforced by a strap and die-formed angle substructure. Substructure includes all mounting holes for easy assembly of table.
- **Standard:** All steel surfaces of the top and seats are covered with a thermo-plastic coating in a Brown color (indicated by "DW" in model no., e.g. UTK/G-6DW). The UV-stabilized thermo-plastic coating is applied in a multi step process of material preparation and finish application designed to permanently heat fuse and bond the finish to the steel. The thermo-plastic polyethylene finish is impact resistant, does not support mold or mildew, and the textured matte surface is less susceptible to marring and scuffing.
- **Optional:** Color choices of powder coated steel frame components. See Specification Bulletin #SPC-CO-001.
- **Optional:** Color choices of Thermo-plastic coated steel components. For optional colors choices see Specification Bulletin #SPC-CO-001.

AVAILABLE OPTIONS

- **6 or 8 foot lengths**
- **Powder Coat Finish in choice of colors for steel frame components**
- **Choice of colors of Thermo-plastic Coating**
