- **Reinforced door on full-length hinge**
- **Lid and door are self-latching**
- **Includes rigid plastic liner, tilt-out bag rack, and anchor kit**

## SPECIFICATIONS:

- **BPR1-36 Series** Bear Proof Trash Receptacle is designed to prevent damage to the trash receptacle and the spreading of litter due to bears searching for food.
- The receptacle features a tightly fitted, self-latching lid for depositing trash, and a tightly fitted self-latching access door for removing the trash liner. The receptacle is formed into a smooth cylinder, void of areas a bear can grip. The reinforced cylindrical design is stronger than a box shape.
- Overall dimension of the receptacle when closed: 46-7/8" tall, 24-3/8" wide, and 24-3/8" deep. When lid and door are open: 61-1/4" tall, 47-14" wide, and 24-3/8" deep. Receptacle meets ADA guidelines for forward and side reach.
- The shell of the receptacle is a welded construction of 14 ga. formed steel cylinder, reinforced with 7 ga. rib supports, welded to a 7 ga. base with four 25/32" dia holes for anchors. Anchor kit #ANC5-4 (four 1/2" x 5" concrete screw anchors) is included. Receptacle must be anchored to hard surface to be considered "Bear Proof".
- Top of the receptacle is angled for easy access to the 16" dia. hatch opening. The lid is secured by a hinge and a self-closing commercial duty latch. The latch is mounted under a formed shell designed to fit human hands, not bear paws. To release the latch, the hand must reach under shell. Access for bears is further obstructed by a raised form designed into the top of the receptacle. A plastic trim ring seals the lid and covers the steel edge.
- The access door on the front of the receptacle is 30" tall x 23-3/8" wide to allow easy access to a 36 gal. rigid plastic liner (included). Door is 14 ga. steel reinforced with 7 ga. ribs and mounted on a full length continuous hinge. A self-closing latch, accessible only from inside the receptacle, secures the door at the top and bottom of the opening side. Spring loaded pins push the door open when latch is released.
- Entire unit is finished in textured Brown powder coat paint.
- A 36 gallon rigid plastic liner and a tilt-out bag rack are included giving user a choice of trash container options. (Trash bags not included.)
- **Optional:** Choices of colors of textured powder coat finish. Available in green or black.
