

UT Series Wheelchair Accessible Extended Portable Rectangular Table with R-Type Thermo-plastic Coated Perforated Steel Top and Seats

Model UT/CN-6RR/E 6 Ft. Wheelchair Accessible Extended Portable Rectangular Table, with green powder coat frames and red R-Type thermo-plastic coated perforated steel top and seats

- Extended top for wheelchair accessibility at one end
- Strong 1-5/8" diameter all welded, steel pipe end frame construction
- Diagonal bracing for strength and rigidity
- Frames are hot-dip galvanized after fabrication for superior corrosion resistance
- Thermo-plastic Coating heat fused to Perforated Steel Top and Seats for durability
- Thermo-plastic Coating formulated with U.V. stabilizers for ultraviolet protection
- Limited Lifetime Warranty on frames

AVAILABLE OPTIONS

Choice of colors of Powder Coated finish for steel frame components

Choice of colors of Thermo-plastic Coating

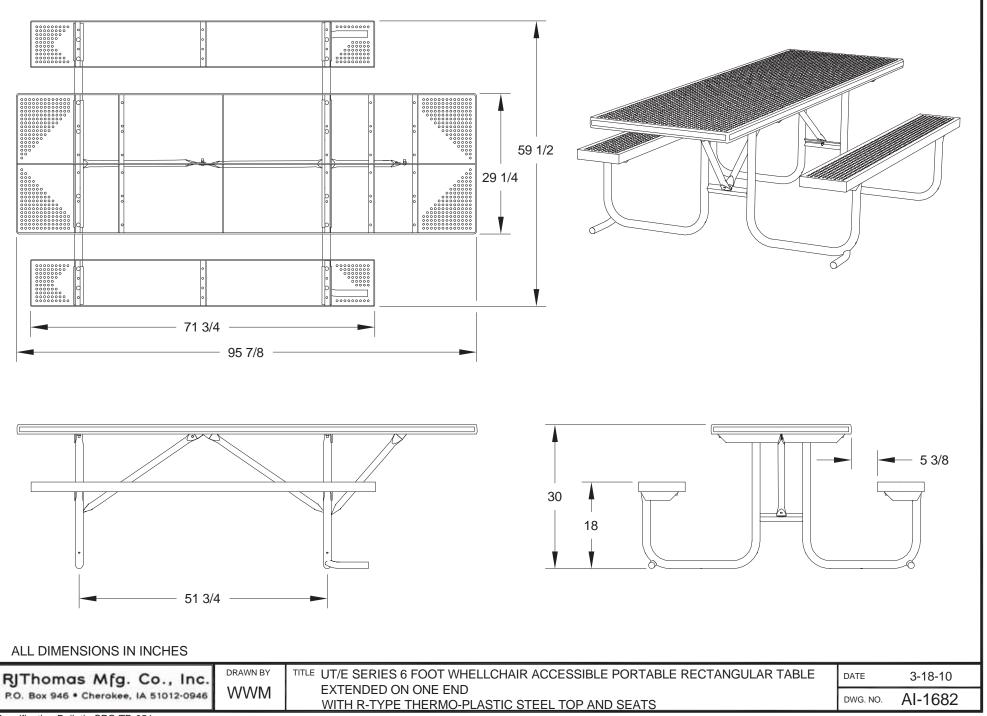

SPECIFICATIONS:

- •UT Series end frames are one-piece welded construction, fabricated from 1.660" O.D. (1-5/8" O.D.) steel pipe to meet 1-1/4" nominal pipe size specifications with 2" x 2" x 1/8" die formed steel angle for attaching the seats and top. "Outriggers" are attached to the frame on the extended end of the table for added stability.
- Table frame design incorporates nontip, nontrip, walkthrough design features. Bends are tightly formed to prevent tipping when weight is on one side.
- **Model UT/G-6/E** has nominal 6 ft. long seats and a nominal 8 ft. long top. Includes stabilizing frame outriggers.
- Nominal table height is 30-3/16". Nominal seat height is 18-3/16".
- Table top extends 2 ft. beyond seats (indicated by "/E" in model no., e.g. UT/G-6RW/E) to provide the ADA recommended wheelchair clearances of: 30" wide, 27" under table (ground to bottom of table top), and 24" total knee and toe clearance (19" + 5").
- Frames are supported by diagonal braces of 1-5/16" O.D. 14 ga. wall steel pipe that connect to the underside of the table top.
- **Standard:** All steel frame components are hot-dip galvanized after fabrication to ASTM-A123 to maintain an average zinc coating of 2.0 oz. per sq. ft. of surface area (indicated by "/G" in model no., e.g. UT/**G**-6RW/E).
- All fasteners are provided for assembly.
- **R-Type** table top (14 ga.) and seats (12 ga.) are each one-piece welded construction, fabricated from perforated steel, with 9/16" dia. holes in a 13/16" center to center in-line pattern, and 2" formed vertical edges on all sides and reinforced by a strap and angle substructure.
- **Standard:** All steel surfaces of the top and seats are covered with a thermo-plastic coating in a Brown color (indicated by "RW" in model no., e.g. UT/G-6**RW**/E). The UV-stabilized thermo-plastic coating is applied in a multi step process of material preparation and finish application designed to permanently heat fuse and bond the finish to the steel. The thermo-plastic polyethylene finish is impact resistant, does not support mold or mildew, and the textured matte surface is less susceptible to marring and scuffing.
- **Optional:** Color choices of powder coated steel frame components. For optional colors choices see Specification Bulletin # SPC-CO-001.
- **Optional:** Color choices of Thermo-plastic coated steel components. For optional colors choices see Specification Bulletin #SPC-CO-001.
