SITE PRODUCTS

Model WUT/CW-10RN, 10 Ft. long Portable, Universal Accessible Rectangular Table with brown powder coated frames and green R-Type thermo-plastic coated perforated steel top and seats

- Strong 1-5/8" diameter all welded, steel pipe end frame construction
- Nontip, nontrip, walk-through design with wheelchair accessibility at each end
- Full capacity seating when wheelchairs are not in place
- Frames are hot-dip galvanized after fabrication for superior corrosion resistance
- Diagonal bracing for strength and rigidity
- Thermo-plastic Coating heat fused to Perforated Steel Top and Seats for durability
- Thermo-plastic Coating formulated with U.V. stabilizers for ultraviolet protection
- Quality construction throughout
- Limited Lifetime Warranty on frames

AVAILABLE OPTIONS

Choice of colors of Powder Coat Finish on steel frame components

Choice of colors of Thermo-plastic Coating

SPECIFICATIONS:

- •**WUT Series** end frames are one-piece welded construction, fabricated from 1.66" OD x 10 ga. wall steel pipe to meet 1-1/4" nominal steel pipe size specifications with 2" x 2" x 1/8" die-formed steel angle for attaching the top and seats. Bends are tightly formed to prevent tipping when weight is on one side.
- The frame design provides the ADA recommended wheelchair clearance under the table top of: 30" wide, 27" high, and 24" total knee and toe clearance (19" knee + 5" toe) at each end of the table while maintaining the full seating capacity of the table for common use.
- Table frame incorporates nontip, nontrip, walk-through design features.
- $\bullet Model \ WUT/G-10$ has a nom. 10 ft. length with three frames.
- Nominal table height is 30". Frame design provides a nominal 28" of clearance from ground level to the underside of table. Nominal seat height is 18".
- \bullet Frames are supported by diagonal braces of 1-5/16" OD x 14 ga. wall steel pipe that align and provide attachment to the table top.
- All galvanized fasteners are provided for assembly.
- **Standard:** All steel frame components are hot-dip galvanized after fabrication to ASTM-A123 to maintain an average zinc coating of 2.0 oz. per sq. ft. of surface area (indicated by "/G" in model no., e.g. WUT/G-10RW).
- **R-Type** table top and seats are each one-piece welded construction, fabricated from a 14 ga. perforated steel surface with 9/16" dia. holes in a 13/16" center to center in-line pattern and 2" formed 14 ga. steel vertical edges on all sides and reinforced by a strap and die-formed angle substructure.
- **Standard:** All steel surfaces of the top and seats are covered with a thermo-plastic coating in a Brown color (indicated by "RW" in model no., e.g. WUT/G-10RW). The UV-stabilized thermo-plastic coating is applied in a multi step process of material preparation and finish application designed to permanently heat fuse and bond the finish to the steel. The thermo-plastic polyethylene finish is impact resistant, does not support mold or mildew, and the textured matte surface is less susceptible to marring and scuffing.
- **Optional:** All steel frame components have powder coat finish. See Specification Bulletin #SPC-CO-001.
- **Optional:** Color choices of Thermo-plastic coated steel components. For optional colors choices see Specification Bulletin #SPC-CO-001.
