

*Model WUT/CB-6RA 6 Ft. Portable, Universal Accessible  
Rectangular Table with black powder coated frames  
and gray thermo-plastic coated R-Type perforated steel top and seats*

- **Strong 1-5/8" diameter all welded, steel pipe end frame construction**
- **Nontip, nontrip, walk-through design with wheelchair accessibility at each end**
- **Full capacity seating when wheelchairs are not in place**
- **Frames are hot-dip galvanized after fabrication for superior corrosion resistance**
- **Diagonal bracing for strength and rigidity**
- **Thermo-plastic Coating heat fused to Perforated Steel Top and Seats for durability**
- **Thermo-plastic Coating formulated with U.V. stabilizers for ultraviolet protection**
- **Quality construction throughout**
- **Limited Lifetime Warranty on frames**

#### **AVAILABLE OPTIONS**

- **6 or 8 foot lengths**
- **Choice of colors of Powder Coat Finish on steel frame components**
- **Choice of colors of Thermo-plastic Coating**

#### **SPECIFICATIONS:**

- **WUT Series** end frames are one-piece welded construction, fabricated from 1.66" OD x 10 ga. wall steel pipe to meet 1-1/4" nominal steel pipe size specifications with 2" x 2" x 1/8" die-formed steel angle for attaching the top and seats. Bends are tightly formed to prevent tipping when weight is on one side.
- The frame design provides the ADA recommended wheelchair clearance under the table top of: 30" wide, 27" high, and 24" total knee and toe clearance (19" knee + 5" toe) at each end of the table while maintaining the full seating capacity of the table for common use.
- Table frame incorporates nontip, nontrip, walk-through design features.
- **Model WUT/G-6** has a nom. 6 ft. length.
- **Model WUT/G-8** has a nom. 8 ft. length.
- Nominal table height is 30". Frame design provides a nominal 28" of clearance from ground level to the underside of table. Nominal seat height is 18".
- Frames are supported by diagonal braces of 1-5/16" OD x 14 ga. wall steel pipe that align and provide attachment to the table top.
- All galvanized fasteners are provided for assembly.
- **Standard:** All steel frame components are hot-dip galvanized after fabrication to ASTM-A123 to maintain an average zinc coating of 2.0 oz. per sq. ft. of surface area (indicated by "/G" in model no., e.g. WUT/G-6RW).
- **R-Type** table top and seats are each one-piece welded construction, fabricated from a 14 ga. perforated steel surface with 9/16" dia. holes in a 13/16" center to center in-line pattern and 2" formed 14 ga. steel vertical edges on all sides and reinforced by a strap and die-formed angle substructure.
- **Standard:** All steel surfaces of the top and seats are covered with a thermo-plastic coating in a Brown color (indicated by "RW" in model no., e.g. WUT/G-6RW). The UV-stabilized thermo-plastic coating is applied in a multi step process of material preparation and finish application designed to permanently heat fuse and bond the finish to the steel. The thermo-plastic polyethylene finish is impact resistant, does not support mold or mildew, and the textured matte surface is less susceptible to marring and scuffing.
- **Optional:** All steel frame components have powder coat finish. See Specification Bulletin #SPC-CO-001.
- **Optional:** Color choices of Thermo-plastic coated steel components. For optional colors choices see Specification Bulletin #SPC-CO-001.
- **U.S. Patent Nos. D489,539; D490,992; D493,291; D496,799; D497,262; 6,918,630**
