SPECIFICATION BULLETIN

Model WXT/CB-10RA 10 Ft. Portable, Universal Access Rectangular Table with black powder coat frames and gray $R$-Type thermo-plastic coated perforated steel top and seats

- Constructed specifically for heavy use areas
- Nontip, nontrip, walk-through design, wheelchair accessibility at each end
- Full capacity seating when wheelchairs are not in place
- All welded end frames are fabricated from 2-3/8" diameter steel pipe
- Diagonal braces align and strengthen entire table
- Frames are hot dip galvanized after fabrication for superior corrosion resistance
- Thermo-plastic Coating heat fused to Perforated Steel Top and Seats for durability
- Thermo-plastic Coating formulated with U.V. stabilizers for ultraviolet protection
- Limited Lifetime Warranty on frames

## AVAILABLE OPTIONS

Powder Coat Finish in choice of colors on steel frame components
Choice of colors of Thermo-plastic Coating

## SPECIFICATIONS:

-WXT Series end frames are one-piece welded construction, fabricated from 2.375 " (2-3/8") O.D. x 10 ga. wall steel pipe to meet 2" nominal steel pipe size specifications with 2 " x 2 " x $1 / 8^{\prime \prime}$ die-formed steel angle for attaching seats and tops. Bends are tightly formed to prevent tipping when weight is on one side.

- Frame design provides the ADA recommended wheelchair clearances under the table top of: 30 " wide, 27 " high and 24 " total knee and toe clearance ( 19 " knee $+5^{\prime \prime}$ toe) at each end of the table while maintaining full seating capacity of the table.
- Frame design incorporates nontip, nontrip, walk-through features.
- Model WXT/G-10 has a nom. 10 ft . in length with three frames.
- Nominal table height is 30 ". Frame design provides a nominal 28 " of clearance from ground level to the underside of table. Nominal seat height is 18 ".
- Frames are supported by diagonal braces of 1-5/16" O.D. x 14 ga. wall steel pipe that connect to the table top.
- All fasteners are provided for assembly.
- Standard: All steel frame components are hot-dip galvanized after fabrication to ASTM-A123 to maintain an average zinc coating of 2.0 oz . per sq. ft. of surface area (indicated by "/G" in model no., e.g. WXT/G-10RW).
- R-Type table top (14 ga.) and seats (12 ga.) are each one-piece welded construction, fabricated from perforated steel, with $9 / 16^{\prime \prime}$ dia. holes in a $13 / 16^{\prime \prime}$ center to center in-line pattern, and $2^{\prime \prime}$ formed vertical edges on all sides and reinforced by a strap and angle substructure.
- Standard: All steel surfaces of the top and seats are covered with a thermo-plastic coating in a Brown color (indicated by "RW" in model no., e.g. WXT/G-10RW). The UV-stabilized thermo-plastic coating is applied in a multi step process of material preparation and finish application designed to permanently heat fuse and bond the finish to the steel. The thermo-plastic polyethylene finish is impact resistant, does not support mold or mildew, and the textured matte surface is less susceptible to marring and scuffing.
- Optional: All steel frame components have powder coat finish. See Specification Bulletin \#SPC-CO-001.
- Optional: Color choices of Thermo-plastic coated steel components. For optional colors choices see Specification Bulletin \#SPC-CO-001.
-U.S. Patent Nos. D489,539; D490,992; D493,291; D496,799; D497,262; 6,918,630
