

SNOW LOAD RATED

Equipped with additional bracing to withstand high elevation snow loads and other extreme weight loads.

Model XT/G-10VW 10 Ft. Extra Heavy Duty Portable Rectangular Table with hot dip galvanized frames and brown V-Type thermo-plastic coated expanded steel top and seats

- **Snow load/extreme load rated to 1420 lbs. per square foot**
- **Top and seats designed for more abusive environments such as high elevations where snow loads can destroy average tables**
- **Nontip, nontrip walk-through design**
- **All welded end frames are fabricated from 2-3/8" diameter steel pipe**
- **Diagonal braces align and strengthen entire table**
- **Frames are hot dip galvanized after fabrication for superior corrosion resistance**
- **Thermo-plastic Coating heat fused to Expanded Steel Top and Seats for durability**
- **Thermo-plastic Coating formulated with U.V. stabilizers for ultraviolet protection**
- **Limited lifetime warranty on frames**

AVAILABLE OPTIONS

- Choice of colors of Powder Coated finish for steel frame components
- Choice of colors of Thermo-plastic Coating

SPECIFICATIONS:

- **XT Series** end frames are one-piece welded construction, fabricated from 2.375" (2-3/8") O.D. steel pipe to meet 2" nominal steel pipe size specifications with 2" x 2" x 1/8" die formed steel angle for attaching the seats and tops.
- **Snow Load Capacity:** This table has been independently tested to meet the U.S. Forest Service snow load requirement of 1420 lbs. per square foot. *(Test results available upon request)*
- Table frame design incorporates nontip, nontrip, walk-through design features. Bends are tightly formed to prevent tipping when weight is on one side.
- **Model XT/G-10VW** is a nominal 10 ft. long with three frames.
- Nominal table height is 31". Nominal seat height is 19".
- Frames are supported by diagonal braces of 1-5/16" O.D. x 14 ga. wall steel pipe that connect to the underside of the table top.
- **Standard:** All frame components are hot-dip galvanized after fabrication to ASTM-A123 to maintain an average zinc coating of 2.0 oz. per sq. ft. of surface area (indicated by "/G" in model no.), e.g. XT/G-10VW.
- All galvanized fasteners are provided for assembly.
- **V-Type** table top and seats are each a one-piece welded construction, fabricated from a 3/4-#9 expanded steel surface with 10 ga. x 2-1/2" roll-formed vertical edges on all sides and reinforced by a 10 ga. die-formed angle substructure. Substructure includes all mounting holes for easy assembly of table.
- **Standard:** All steel surfaces of the top and seats are covered with a thermo-plastic coating in a Brown color (indicated by "VW" in model no., e.g. XT/G-10VW). The UV-stabilized thermo-plastic coating is applied in a multi step process of material preparation and finish application designed to permanently heat fuse and bond the finish to the steel. The thermo-plastic polyethylene finish is impact resistant, does not support mold or mildew, and the textured matte surface is less susceptible to marring and scuffing.
- **Optional:** Color choices of powder coated steel frame components. See Specification Bulletin #SPC-CO-001.
- **Optional:** Color choices of Thermo-plastic coated steel components. For optional colors choices see Specification Bulletin #SPC-CO-001.
