SPECIFICATIONS:

- Model CN-R/D-32 is a 32 gal. capacity trash receptacle with all-welded construction, fabricated from a single piece of 3/4-#9 expanded steel formed into a cylindrical shape 23-1/4" O.D. x 22-7/8" I.D. x 29-3/4" high.
- The receptacle is reinforced with 10 ga. top and bottom rings and die-formed cross braces across the bottom providing holes for anchoring options.
- Standard: All steel surfaces of the receptacle are covered with a thermoplastic coating in a Brown color (indicated by "DW" in model no., e.g. CN-R/DW-32). The UV-stabilized thermo-plastic coating is applied in a multi step process of material preparation and finish application designed to permanently heat fuse and bond the finish to the steel. The thermo-plastic polyethylene finish is impact resistant, does not support mold or mildew, and the textured matte surface is less susceptible to marring and scuffing.
- Optional: Color choices of thermo-plastic coated steel components. See Specification Bulletin #SPC-CO-001.
