Model CN-R/R Round Perforated Steel Trash Receptacle Holder for 32 Gallon Containers

SPECIFICATIONS:

- **Model CN-R/R Series** trash receptacle is an all-welded construction, fabricated from a single piece of 14 ga. perforated steel with 9/16" dia. holes in a 13/16" center to center in-line pattern formed into a cylindrical shape.
- The receptacle is reinforced with 10 ga. top and bottom rings and die-formed cross braces across the bottom providing holes for anchoring options.
- Model CN-R/R-32 is a 32 gal. capacity trash receptacle 23-1/4" O.D. x 22-7/8" I.D. x 29-3/4" high.
- **Standard:** All steel surfaces of the receptacle are covered with a thermoplastic coating in a Brown color (indicated by "/RW" in model no., e.g. CN-R/**RW**-32). The UV-stabilized thermo-plastic coating is applied in a multi step process of material preparation and finish application designed to permanently heat fuse and bond the finish to the steel. The thermo-plastic polyethylene finish is impact resistant, does not support mold or mildew, and the textured matte surface is less susceptible to marring and scuffing.
- **Optional:** Color choices of thermo-plastic coated steel components. See Specification Bulletin #SPC-CO-001.
- **Optional:** In place of thermo-plastic coating, all steel components are hotdip galvanized after fabrication to ASTM-A123 to maintain an average zinc coating of 2.0 oz. per sq. ft. of surface area (replace "RW" in model no. with "/R/G", e.g. CN-R/**R**/**G**-32).
