

Model DMS-TNT350 Disinfectant Misting System

SPECIFICATIONS:

- The **DMS-TNT350** Disinfectant Misting System is a complete, ready to use machine to apply disinfectant to most surfaces. Components of the mister are designed to atomize the water-based disinfecting mixture to a fine mist. This mist thoroughly coats the surface, won't run off the surface and doesn't require scrubbing or wiping. Just let it dry. There is no residue. Each mister comes with one gallon of Quat-San Sanitizer/Disinfectant. The DMS-TNT350 can be used inside or outside.
- **Portable:** The DMS-TNT350 Disinfectant Misting System is assembled/installed on a pre-galvanized steel base plate, is portable and can be moved using a variety of different mobile devices: wheeled carts (*see Option below*), wagons, cargo area of side-by-sides, ATV's and four-wheelers, pickup cargo beds. The 25' power cord and 75' hose will give you location flexibility and a wide area reach. Your own extension cord can be used for greater reach if necessary.
- **Indoor and Outdoor Use:** The DMS-TNT350 Disinfectant Misting System can be used inside or outside.
- **Dilution Rate:** Only 1.50 oz. of Quat-San disinfectant per gallon of water. Because the disinfectant is applied as a mist, one gallon of mixture will last a long time and cover many surfaces.
- **Outdoor Uses:** Apply to picnic tables, park benches, trash receptacle lids, hand rails, playground equipment, charcoal grill handles, drinking fountains, door frames and handles/knobs, tools, common areas, food courts, public restrooms, vehicle interiors/controls/dashboard. Any hard, nonporous surface you want to disinfect.
- **Indoor Uses:** Apply to tables, chairs, benches, door frames and handles, railings, toys and recreation equipment, desks, windows, display cases, tools, counter tops, kitchen equipment, lunch rooms, locker rooms and equipment, keyboards, telephones. Any hard, nonporous surface you want to disinfect.
- The pump and pressure combination provides the correct atomization of the mist to achieve as close to 100% coverage as possible, and do it quickly (*to save you time*).

Model DMS-TNT350 Complete Disinfectant Misting System with pre-galvanized steel base plate. No assembly required. Made in the USA.

Model DMS-TNT350 Complete Disinfectant Misting System shown with optional **Model DMS-CART1630** utility cart.

Model DMS-QUATSAN disinfectant
1 gallon bottle (shown).

Quat-San No-Rinse Sanitizer/Disinfectant

(from Crown Chemical Inc.)

- This product is an EPA registered sanitizer, disinfectant, virucide, mildewstat, cleaner and deodorizer for use in restaurants, bars, institutional kitchens, food handling and process areas. Can be used on hard, nonporous food contact areas.
- The application is a mist that lightly coats the surface. Surfaces must remain wet for at least 1 minute, then allowed to air dry. No water rinse is necessary. Does not leave a residue. No wiping is required.
- This product is included on the EPA's List N of disinfectants that meet the criteria for use against COVID-19.
- **Safety:** Wear eye protection/face protection, protective gloves and clothing when operating the mister. Wash hands thoroughly after use. Do not eat, drink or smoke when using this product/mister. Keep away from open flames and hot surfaces.
- Refer to Quat-San Safety Data Sheet at www.crown-chem.com.
