SPECIFICATIONS:

- **T600 Series** end frames are one-piece welded construction, fabricated from 2.375" O.D. (2-3/8" O.D.) steel pipe to meet 2" nominal steel pipe size specifications with 2" x 2" x 3/16" A-36 structural grade steel angle attaching the seats and top. Welded mounting plates with 9/16" dia. holes allow table to be permanently anchored to hard surfaces. Anchors not included.
- Table frame design incorporates step-over or walk-through design depending on seat configuration. Short seats are supported by a 7 ga. steel plate bracket. Gap between seats allows walk-through access.
- Table provides ADA compliant access for a wheelchair at each end of the table: 30" wide, 19" deep, and 27" from ground to bottom of table top for knee space, and minimum 9" above ground extending a total of 24" deep for toe space.
- Nominal table height is 30". Nominal seat height is 18".
- Frames are supported by diagonal braces of 1-5/16" O.D. x 14 ga. wall steel pipe connected to the table top designed to align and provide attachment to the table top.
- All fasteners are provided for assembly.
- **Standard:** All steel frame components are hot-dip galvanized after fabrication to ASTM-A123 to maintain an average zinc coating of 2.0 oz. per sq. ft. of surface area (indicated by "/G" in model no., e.g. T602/G-6DW).
- **D-Type** table top and seats are each a one-piece welded construction, fabricated from a 3/4-#9 expanded steel surface with 2" roll-formed 14 ga. steel vertical edges on all sides and reinforced by a strap and die-formed angle substructure. Substructure includes all mounting holes for easy assembly of table.
- **Standard:** All steel surfaces of the top and seats are covered with a thermo-plastic coating in a Brown color (indicated by "DW" in model no., e.g. T602/G-6DW). The UV-stabilized thermo-plastic coating is applied in a multi step process of material preparation and finish application designed to permanently heat fuse and bond the finish to the steel. The thermo-plastic polyethylene finish is impact resistant, does not support mold or mildew, and the textured matte surface is less susceptible to marring and scuffing.
- **Optional:** All steel frame components have powder coat finish. See Specification Bulletin #SPC-CO-001.
- **Optional:** Color choices of Thermo-plastic coated steel components. For optional colors choices see Specification Bulletin #SPC-CO-001.
