REV. 06-22

- Table frame design incorporates step-over or walk-through design depending on seat configuration. Short seats are supported by a 7 ga. steel plate bracket. Gap between seats allows walk-through access
- Table provides ADA compliant access for a wheelchair at each end of the table: 30" wide, 19" deep, and 27" from ground to bottom of table top for knee space, and minimum 9" above ground extending a total of 24" deep for toe space.
- Nominal table height is 29-1/2". Nominal seat height is 17-1/2".
- Frames are supported by diagonal braces of 1-5/16" O.D. x 14 ga. wall steel pipe connected to the table top.
- All fasteners are provided for assembly.
- Standard: All steel frame components are hot-dip galvanized after fabrication to ASTM-A123 to maintain an average zinc coating of 2.0 oz. per sq. ft. of surface area (indicated by "/G" in model no., e.g. T602/G-6RW).
- R-Type table top (14 ga.) and seats (12 ga.) are each one-piece welded construction, fabricated from perforated steel, with 9/16" dia. holes in a 13/16" center to center in-line pattern, and 2" formed vertical edges on all sides and reinforced by a strap and angle substructure.
- Standard: All steel surfaces of the top and seats are covered with a thermo-plastic coating in a Brown color (indicated by "RW" in model no., e.g. T602/G-6RW). The UV-stabilized thermo-plastic coating is applied in a multi step process of material preparation and finish application designed to permanently heat fuse and bond the finish to the steel. The thermo-plastic polyethylene finish is impact resistant, does not support mold or mildew, and the textured matte surface is less susceptible to marring and scuffing.
- **Optional:** Color choices of Thermo-plastic coated steel components. For optional colors see Specification Bulletin #SPC-CO-001.
- Optional: All steel frame components have powder coat finish. See Specification Bulletin #SPC-CO-001.
