

UTK Series 6 and 8 foot Children's Rectangular Table with R-Type Thermo-plastic Coated Perforated Steel Top and Seats

SPECIFICATION
BULLETIN
#SPC-TB-089

REV. 11-19

Model UTK/CW-6RN 6 ft. Children's Rectangular Table with brown powder coated frames and green R-type thermo-plastic coated perforated steel top and seats

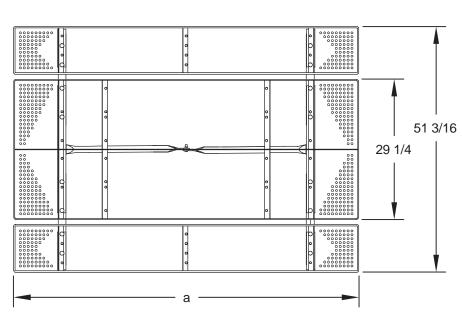

- Scaled to fit children up to 12 years of age
- · Nontip, nontrip, walk-through design
- Strong 1-5/8" diameter all welded, steel pipe end frame construction
- Frames are hot-dip galvanized after fabrication for superior corrosion resistance
- Thermo-plastic Coating heat fused to Perforated Steel Top and Seats for durability
- Thermo-plastic Coating formulated with U.V. stabilizers for ultraviolet protection
- Diagonal bracing for strength and rigidity

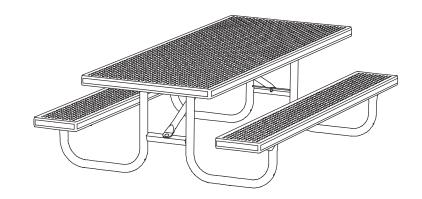

SPECIFICATIONS:

- **UTK Series** end frames are one-piece welded construction, fabricated from 1.660" O.D. (1-5/8" O.D.) steel pipe to meet 1-1/4" nominal pipe size specifications with 2" x 2" x 1/8" die formed steel angle for attaching the seats and top.
- Table frame design incorporates nontip, nontrip, walk-through design features. Bends are tightly formed to prevent tipping when weight is on one side.
- Model UTK/G-6 has a 6 ft. nominal length.
- Model UTK/G-8 has a 8 ft. nominal length.
- Nominal table height is 22". Nominal seat height is 12".
- Frames are supported by diagonal braces of 1-5/16" O.D. steel pipe that connect to the underside of the table top to align and provide attachment to the table top.
- All fasteners are provided for assembly.
- **Standard:** All steel frame components are hot-dip galvanized after fabrication to ASTM-A123 to maintain an average zinc coating of 2.0 oz. per sq. ft. of surface area (indicated by "/G" in model no., e.g. UTK/G-6RW).
- **R-Type** table top (14 ga.) and seats (12 ga.) are each one-piece welded construction, fabricated from perforated steel, with 9/16" dia. holes in a 13/16" center to center in-line pattern, and 2" formed vertical edges on all sides and reinforced by a strap and angle substructure.
- Standard: All steel surfaces of the top and seats are covered with a thermo-plastic coating in a Brown color (indicated by "RW" in model no., e.g. UTK/G-6RW). The UV-stabilized thermo-plastic coating is applied in a multi step process of material preparation and finish application designed to permanently heat fuse and bond the finish to the steel. The thermo-plastic polyethylene finish is impact resistant, does not support mold or mildew, and the textured matte surface is less susceptible to marring and scuffing.
- **Optional:** Color choices of powder coated steel frame components. See Specification Bulletin #SPC-CO-001.
- **Optional:** Color choices of Thermo-plastic coated steel components. For optional colors choices see Specification Bulletin #SPC-CO-001.
